Correct. I believe OCAPPM manages the content for About OEI.

Just as a point of clarification, I feel I should mention that this past Friday we (WCSD) helped OPA implement some major changes related to the energy independence site. We took down the Clean Power Plan and Clear Power Plan Toolbox sites and redirected those links to the energy independence site. We also took down the Climate Change site based on direction from OPA. That's a change that caught quite a bit of press over the weekend. (e.g. EPA website removes climate science site from public view after two decades)

Let me know if you have questions or need any additional information.

Thanks,

Lin

Thank you! I assume we do manage content for some sites, such as About OEI. But I take it that we are not the program office managing content for this particular energy independence site?

Hi Annie,

We (OEI) manage the internet infrastructure. Content is managed by the Program Offices under the leadership of the Office of Public Affairs in the Administrator's Office. Let me know if that answers your question.

Hi Lin,

Do we in OEI manage this Energy Independence web page: https://www.epa.gov/energy-independence?

As I understand, we do a lot of work on the framework/back end for many EPA web pages, but most of the www.epa.gov internet pages (including content) are maintained and managed by other program offices. Is that true? I ask because I'm trying to understand OEI's role for the internet – and especially this particular page – better as EPA web pages are shifting around, causing more press inquiries into the agency.

Thanks,

Annie
